Modicon ABL2

Regulated switch mode power supplies

Panel mounting (ABL2REM●●●●●K)

The Modicon ABL2 are Regulated switch mode power supplies, Single-phase, and provide the DC voltage necessary for electrical equipment operating in a low-voltage automation and control system (PLC, HMI, sensors, etc.).

	ABL2REM●●●●●K	ABL2REM●●●●●KL	ABLS●●●●●E
Mounting type	Panel mounting	Panel mounting	DIN rail mounting
			
Input voltage range	100...240 VAC (universal)	200...240 VAC	100...240 VAC (+ DC compatible)
Output voltage	24 VDC	24 VDC	12 / 24 / 48 VDC
Power range	35...350 W	35...350 W	75...960 W
Cooling	Natural convection or internal fan	Natural convection or internal fan	Passive convection
Efficiency (typ.)	> 88%	> 86%	High efficiency
MTBF	> 600,000 h	> 300,000 h	Industrial-grade
Voltage selection	Automatic or manual (model-dependent)	Automatic	Automatic
Protection	Overload, short-circuit, hiccup restart	Overload, short-circuit, hiccup restart	Constant-current or shutdown mode
Installation density	Compact	Compact	High power density
Typical applications	OEM machines, export, packaging, material handling	Fixed 230 VAC panels, standardized machines	Control cabinets, infrastructure, high-load systems

Panel mounting (ABL2REM●●●●●K)

Panel mounting (ABL2REM●●●●●K)

Presentation

- **ABL2REM●●●●●K** power supplies are fully electronic and have a regulated switch mode. The use of electronics makes it possible to significantly improve the efficiency of these power supplies, which offer:
 - Compact dimensions (See [page 4](#).)
 - Wide power range from 35 to 350 W
 - High degree of output voltage stability (precision: $\pm 1\%$)
 - Proven performance (MTBF over 600K hours)
 - Diagnostics via LEDs at the output terminal
- These power supplies also provide the following protection functions:
 - Integrated output/overload/overvoltage and short-circuit protection with Hiccup restart for all models and overtemperature for models from 200 to 350 W
 - Input overvoltage protection
 - Protective terminal cover to prevent direct finger contact, helping to protect against electric shock hazards
 - Specially designed hole in casing to help prevent risk of short-circuit with long screws.

Applications

ABL2REM●●●●●K power supplies meet the needs encountered in standard commercial machines and conform to worldwide standards. They can be widely used with other electronic appliances and systems in the industry. OEMs and panel builders can easily integrate it into their machines or machine control panels.

- OEMs can integrate these power supplies in simple machines used in the following fields:
 - Material handling
 - Textile machine
 - Packaging
 - Machine tools
 - Food & Beverage
- Panel builders can integrate them in control panels installed in the following fields:
 - Construction
 - Lift
 - Automobile industry
 - Chemical industry
 - Municipal buildings
 - Infrastructure

Panel mounting (ABL2REM●●●●●K)

A user-oriented range of products

Fit for purpose

- **ABL2REM●●●●●K** are more compact than previous ABL2 versions (up to 20% smaller). They are also smaller than other models currently available on the market, thus saving space inside a cabinet for other electric appliances.
- Moreover, the high performance of these products (24 VDC stable output) means less downtime and their high-efficiency design means lower energy consumption.

Ease of use throughout the whole life cycle

- **ABL2REM●●●●●K** power supplies can be mounted quickly and easily owing to the specially designed mounting holes in their casing which help to prevent mistakes.
- In addition, 3 types of mounting are available for more flexibility with the use of accessories:
 - mounting on rear 35 mm (1.37 in.)  rails
 - mounting with 4-corner bracket
 - mounting with L-type accessories
- New, improved labeling and packaging help to ensure quick identification and offer a better view of the products (their appearance is printed on the box).
- For existing installations, non-Schneider power supplies can easily be replaced (same installation dimensions, same mounting hole locations) (1).

Robustness

ABL2REM●●●●●K power supplies have been designed to meet the majority of customer specifications:

- They feature short circuit protection as well as overload protection with an auto-recovery mode (automatic protection reset). This means that the protection resets itself automatically on elimination of the detected fault, which avoids the need to take any action or change a fuse.
- They are equipped with an input voltage (100-240 VAC) smart switch offering increased performance and durability.
- They can operate within a wide temperature range.

Widely available

- Fast delivery through a large distribution network
- Fast access to information and support through the Partner Relationship Management tool and a dedicated network of engineers

Control architecture

(1) The position of the mounting holes on the casing varies slightly compared with previous ABL2 power supply ranges. Please see dimensions on our [website](#).

Description

Power supplies with natural convection

- 1 100/240 VAC input voltage selector (on 150 and 200 W models only)
- 2 Technical information
- 3 A green LED indicating status of the DC output voltages
- 4 An output voltage adjustment potentiometer ($\pm 15\%$)
- 5 A 4 mm² screw clamp terminal block (equipped with plastic protective cover as standard) for connection of the AC input voltage and DC output voltage
- 6 Fixing holes for panel mounting with M3 screws (excluding 200 W model). Four fixing holes for 4-corner bracket mounting with M4 screws (on 200 W model only)

Power supplies with forced air cooling by built-in DC fan

- 7 Four fixing holes for mounting with 4-corner bracket (ABL2K01) and M4 screws
- 8 100/240 VAC input voltage selector (on 250 and 350 W models)
- 9 Built-in DC fan
- 10 Technical information
- 11 A 4 mm² screw clamp terminal block (equipped with plastic protective cover as standard) for connection of the AC input voltage and DC output voltage
- 12 An output voltage adjustment potentiometer ($\pm 15\%$)
- 13 A green LED indicating status of the DC output voltages

Dimensions (overall)

Model	Reference	Dimensions (Height x Width x Depth)	
		mm	in.
35 W	ABL2REM24015K	99 x 82 x 30	3.90 x 3.23 x 1.17

Presentation

The Modicon ABLs are Regulated switch mode power supplies, Single-phase, to provide the DC voltage necessary for electrical equipment operating in a low-voltage automation and control system (PLC, HMI, sensors, etc.) from 75 up to 960 W.

They offer:

- Power ratings including 75 W, 120 W, 240 W, 480 W, and 960 W
- Rated input Voltage:
 - 100-240 VAC for 75 W, 120 W, 240 W, and 480 W
 - 200-240 VAC for 960 W
- Rated output Voltage: 12, 24 and 48 VDC
- Up to 6 output terminals for easy wiring

Main characteristics

Nominal input voltage 100...240 VAC, compatible with 140...340 VDC
200...240 VAC, compatible with 280...340 VDC

Network system compatibility TN, TT, IT

Nominal output voltage 12, 24 and 48 VDC

Operating temperature -20...+70°C (-4...+158°F) (1)

Product certifications

- ☐ CE
- ☐ cUL
- ☐ RoHS compliant
- ☐ REACH compliant

Conformity to standards

Selection of protection on the power supply primary

The device is designed, tested and approved for branch circuits up to 16 A (IEC) and 20 A (UL) without additional protection devices. If external protection is used, do not use circuit breakers smaller than those indicated in the table below to avoid spurious over-current/short-circuit detection by the circuit breaker. Use the **Acti9 iC60** range of Miniature Circuit Breakers (1).

	24 VDC	76.8 W	3.2 A	Constant current mode, automatic recovery after overload is removed	With	ABLS1A24030E	0.396/ 0.873
		120 W	5 A	Constant current mode, automatic recovery after overload is removed	With	ABLS1A24050E	0.451/ 0.994
		240 W	10 A	Constant current mode, automatic recovery after overload is removed	With	ABLS1A24100E	0.935/ 2.061
		480 W	20 A	Constant current mode, shutting down after time delay. Re-power on to recover	With	ABLS1A24200E	1.320/ 2.910
200...240 VAC (compatible with 280...340 VDC)	24 VDC	960 W	40 A	Constant current mode, shutting down after time delay. Re-power on to recover	With	ABLS1A24400E	2.200/ 4.85
	48 VDC	960 W	20 A	Constant current mode, shutting down after time delay. Re-power on to recover	With	ABLS1A48200E	2.200/ 4.85

(1) More information on **Acti9 iC60** range on our [website](#).

(2) Nominal power given for mounting on horizontal rail, for 230 VAC input voltage and for +50°C (131°F) ambient temperature.
